PROFESSIONAL SUMMARY

As a dedicated and motivated Computer Science graduate specializing in Intelligent Systems, I aim to apply my technical skills and analytical capabilities to contribute to a data-driven team. I am eager to gain practical experience, enhance my business acumen, and support projects that leverage data analysis, visualization, and intelligent systems for actionable insights.

KEY SKILLS

Data Analysis | SQL | Python | Data Visualization | Statistical Analysis | Dashboard Reporting | Attention to Detail | Critical Thinking | Problem-Solving | Clear Communication of Insights

TECH PROFICIENCY

Data Analysis: Excel (Advanced — PivotTables, VLOOKUP/XLOOKUP, Power Query), Google Sheets, SQL, Microsoft Access

Programming: Python (Pandas, NumPy, Jupyter, Anaconda), Visual Studio Code, Git/GitHub

Visualization/BI: Microsoft Power BI, Tableau, Google Data Studio

Data Mining & ML Concepts: RapidMiner, Apriori Algorithm, Ensemble Methods, Classification & Clustering Techniques

EDUCATION

Bachelor of Science and Computer Science with Specialization in Intelligent Systems
De La Salle University - Dasmariñas | 2021 - 2025
Magna Cum Laude, Dean's Lister (A.Y. 2021-2025), Excellence in Leadership Awardee (2024)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Statistics & Probability, Data Mining, Software Engineering

EXPERIENCE

Committee Member
College of Science and Computer Studies Student Government (August 2021 - December 2023)

- Organized and maintained event data using Google Sheets and Notion, structuring records that streamlined logistics and improved reporting accuracy across multiple college events.
- Designed event scoresheets and analyzed competition results through data visualizations, improving evaluation efficiency and providing actionable insights on event performance.
- Coordinated logistics and partnerships across events, ensuring smooth execution and consistent cross-team collaboration with zero major scheduling conflicts.

Legislative Councilor
College of Science and Computer Studies Student Government (January 2024 - April 2024)

- Researched facts and statistics to support legislative drafting, building dashboard reports in Google Sheets to justify and communicate the impact of proposed legislation to student government stakeholders.
- Synthesized research into concise reporting formats used to present and defend legislative proposals in council sessions.

Director of Creatives
College of Science and Computer Studies Student Government (July 2024 - February 2025)

- Directed the Creatives Committee's data and record-keeping processes, implementing Excel, Google Sheets, and Notion systems that improved workload tracking and reporting accuracy across multiple college events.

- Oversaw the design of event scoresheets and evaluation frameworks, using data visualizations to guide the committee's competition analysis and strengthen event performance insights.
- Managed and mentored the Creatives Committee, delegating responsibilities across events while maintaining consistent quality and reporting standards.

Intern - Team Lead Assistant

The Umonics Method, Singapore (June 2024 - August 2024)

- Built and presented weekly dashboarding reports tracking progress across all work materials and team output, providing consistent visibility and supporting data-driven performance reviews.
- Conducted Google Search Console (GSC) inspections to monitor website performance metrics, identifying indexing issues and informing content and SEO optimization decisions.
- Maintained structured datasets for learning materials, ensuring accurate versioning, data integrity, and integration into training workflows.
- Managed multiple WordPress websites, applying GSC insights to optimize content, functionality, and accessibility.
- Compiled and organized learning material data during intern onboarding, supporting structured skill assessment and resource allocation.

Freelance

Self-Employed / Various Clients (October 2025 - Present)

- Built customized incentive tracking sheets for small business owners, automating commission calculations and improving payout accuracy and transparency.
- Designed and maintained inventory management systems in Excel/Google Sheets, reducing manual tracking errors and improving stock visibility for clients.
- Developed personal spending trackers with automated categorization and visualizations, helping clients identify spending patterns and budget more effectively.
- Assisted undergraduate and graduate researchers with thesis data analysis, including data cleaning, running statistical tests (e.g., t-tests, regression, correlation), and creating visualizations to support their findings and conclusions.

PROJECTS

Read more at https://github.com/KatherineBayan/Portfolio/tree/main

Coffee Sales Excel Dashboard

Excel (PivotTables, Slicers, Data Modeling) | GitHub Repository

- *Built an interactive dashboard from a three-table dataset (1,000 orders, 1,000 customers, 48 products), linking tables through Customer and Product IDs and adding a timeline and slicers that filter every chart at once.*
- *Found that the US accounts for about 79% of $45.1K in sales and that the top 5 customers make up only about 3% of revenue, showing low dependency on any single account.*

Hardware and Tech Sales Performance Dashboard

Excel (PivotTables, KPI Design, Slicers) | GitHub Repository

- *Designed a KPI-first dashboard analyzing 2,000 orders across 5 regions, 4 sales channels, and 6 product categories, with year, quarter, and month timelines and slicers.*
- *Identified that Computers drive about 55% of $2.45M in revenue, Corporate Sales orders average 2.1x those of Online, and 86% of orders carry a discount that reduced revenue by about $199K.*

ASOS Product Analysis

Python (Pandas), Data Cleaning, EDA | GitHub Repository

- ***Cleaned 9,708 product records down to 8,438 and consolidated them into 525 unique products to analyze size-level stockouts and brand performance.***
- ***Found that 23.98% of size options were sold out and 50.41% of products had at least one sold-out size, then flagged 109 high-priority products for inventory review.***
